

Issuance of Itemized Medical Statements

At our hospital, we issue itemized medical statements to promote transparency in medical care and to provide patients with detailed information about their treatment.

We also issue these statements to recipients of publicly funded medical care who have no out-of-pocket expenses, upon request. If you would like to receive one, please inform the General Reception Desk.

Please note that the itemized medical statement includes the names of the medications used and the examinations/tests performed.

Patients who have a copayment and do not wish to receive an itemized medical statement should please inform the General Reception Desk accordingly.
